## Creating Video-based Lesson

### DIY eLearning Studio

The DIY eLearning Studio is a revolutionary self-operated studio that allows the presenter to appear alongside his or her presentation materials, providing a more life-like classroom situation. It is a perfect solution for all on-the-go educators as it possesses high quality production rates. An easy and simple self-operated virtual studio recording system which enhances your viewer experiences. This one desk layout system allows anyone to produce videos easily and quickly.

#### Benefits

- **Customizable**  
content focused design
- **Powerful**  
strong computing capacity
- **Simple To Use**  
Intuitive System layout

## Delivering Blended Learning

### D2L BRIGHTSPACE

D2L Brightspace is an excellent LMS that allows teachers to focus on their students' needs by having great access to content building, assessment and evaluation as well as conducting lessons. D2L Brightspace make course building quick with simple drag and drop options. It also possesses gamification which rewards students with badges whenever they get an achievement.

#### Benefits

- **Saves Time**  
Build content quickly
- **Flexible**  
Freedom to design their own assignments
- **Meet the needs of students**  
Students are provided the best learning opportunities

## Conducting Remote Exam

### eProctoringMinds

eProctoringMinds is an AI online invigilation solution that helps educational institutions to fully utilize the power of AI (artificial intelligence) to proctor students' in their own homes. It uses pre-determined models that are based on extensive research done by Intel. Incredibly versatile and powerful, eProctoringMinds can be used for exams at any educational level as well as micro-credentials.

#### Benefits

- Suitable for the current trend of having online/hybrid learning and examinations
- Able to handle hundreds/thousands of students taking 1-2 hours of online exams simultaneously
- Non-productive work is largely reduced with this "potential-fraud detection" solution.

# How eLearningminds Can Help You

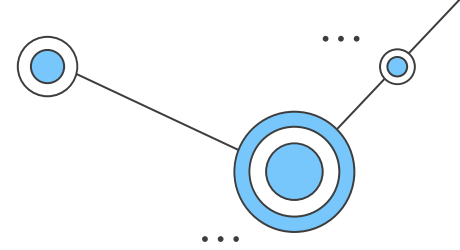

We at eLearningminds believe that you should make the technology work for you meaning we want educators to have more ease in providing education to their students.

With the usage of cutting edge, revolutionary technological tools, we are certain that teachers, students and parents alike will experience a far better engagement in the effort to nurture young minds.

We'll be introducing 3 tools we hope teachers will utilise and grow to love and they are – DIY eLearning Studio, D2L Brightspace and eProctoringMinds.

# How 3 Tools Can Be Your Solution

## DIY eLearning Studio

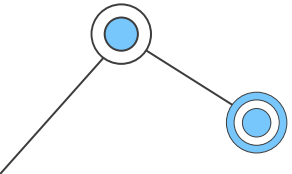

- Revolutionary self-operated studio
- Presenter will appear alongside the materials
- Excellent graphics
- High quality production value
- Life-like virtual classroom setting

## D2L Brightspace

- An LMS that focuses on the teachers, students, parents
- Builds courses quickly
- Communication tools
- Has competency-based education
- Gamification – achieving badges

## eProctoringMinds

- Human-less approach to invigilation
- Helps identify even the smallest discrepancies
- Automatically generated

# A Closer Look at All 3

## DIY eLearning Studio

The DIY eLearning Studio is a revolutionary self-operated studio that allows the presenter to appear alongside his or her presentation materials, providing a more life-like classroom situation. It is a perfect solution for all on-the-go educators as it possesses high quality production rates.

## D2L Brightspace

D2L Brightspace is an excellent LMS that allows teachers to focus on their students' needs by having great access to content building, assessment and evaluation as well as conducting lessons. Parents too are involved as they can view their child's performance, courses and more. D2L Brightspace make course building quick and easy with simple drag and drop options. It also possesses gamification which rewards students with badges whenever they demonstrate a positive trait or achievement.

## eProctoringMinds

A human-less, ground-breaking approach, AI proctoring helps identifies even the smallest of discrepancies during an online exam.

Students are required to do a 360° recording of their workspace before the examination for transparency that they are not cheating. The recording along with the recording during the examination is sent to the Intel Processor for processing and proctoring results are ready between 12 to 24 hours.

# How These 3 Tools Help Your Classroom

01

## Blended Learning

Classrooms that incorporate technology in the teaching experience

02

## Flipped Classroom

Classrooms where students utilize technology and consume content prior to the class itself.

03

## Virtual/Hybrid Classrooms

An online classroom or classroom with a mix of students attending it physically or online.

## Blended Learning, flipped classroom, virtual/hybrid

In either a blended learning, flipped or virtual or hybrid classrooms where a teacher is employing technological assistance, all 3 – DIY eLearning Studio, D2L Brightspace, eProctoringMinds – can be utilised.

A teacher can record themselves live or for later upload using DIY eLearning Studio. They can easily toggle from being the focus of the screen or be minimised to showcase their materials. They can also choose a wide array of appropriate backgrounds that suit the subject they are teaching.

The materials shared on the screen can be from D2L Brightspace since the course is uploaded there along with other materials such as videos and images.

In an examination or test setting, a teacher can further employ the use of eProctoringMinds whereby the students who are taking the exam will then be invigilated by an AI that monitors their body movement, eye contact and more; detecting the most minute of inconsistencies and alerting the teacher later.
